

Figure 7. Protein expression of SMC-G, SMC-B, and SMC-T on culture day 4. Images taken at 20X magnification showing expression of calponin (red, top), f-actin (green, middle), DAPI (blue, all), and merged (bottom)

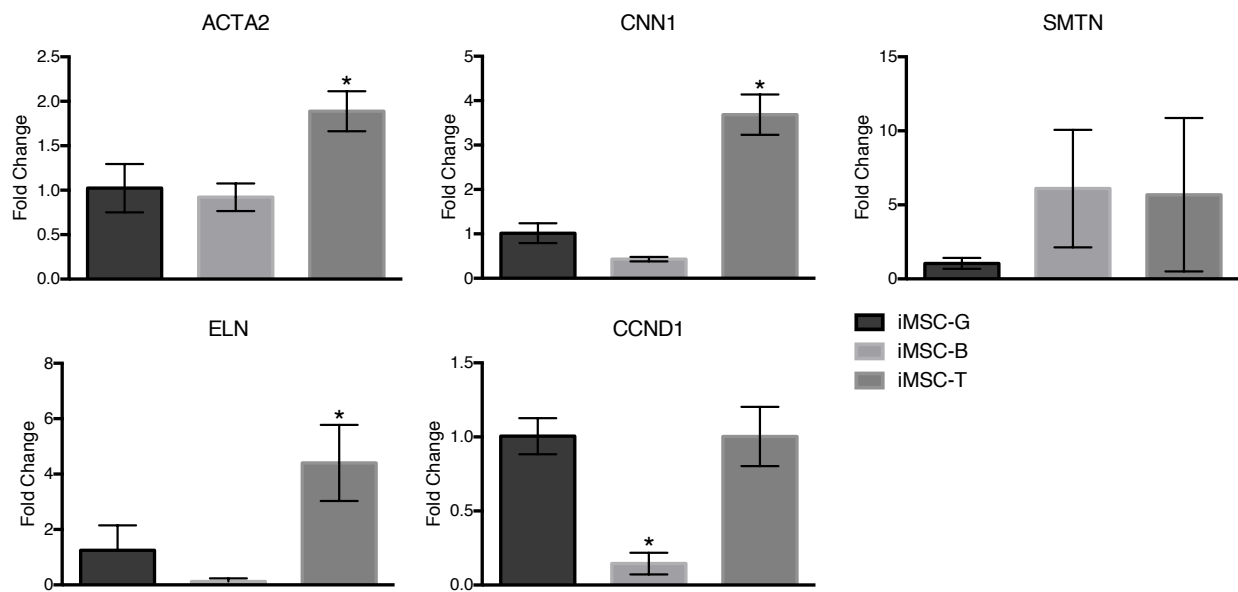

Figure 8. qPCR analysis of SMC-G, SMC-B, and SMC-T on culture day 4. Profiles for α smooth muscle actin (top left), calponin (top middle), smoothelin (top right), elastin (bottom left), cyclin d1 (bottom middle), * $p < 0.05$ one-way ANOVA
